SKILLS

- JavaScript
- Typescript
- Node/Express
- MongoDB
- React
- Redux
- HTML
- CSS
- AJAX/Axios
- Ruby on Rails
- PostgresQL
- Heroku
- Debugging

EDUCATION

No Degree
Victor Valley College
Victorville, CA
2010

High School Diploma
Sultana High
Victorville, CA
2009

WORK EXPERIENCE

SOFTWARE DEVELOPER/TECHNICAL INSTRUCTOR
App Academy – San Francisco, CA - 2018 - Present

A premier programming bootcamp that teaches **React on Rails** and the **MERN** stack.
- Utilized the **Puppeteer** library to scrape data from various internal web apps to compile data on students
- Leveraged the **jsforce** NPM package to automate note taking workflow in **Salesforce,** allowing instructors to take on a 100% increase in their student caseload
- Integrated the **googleapis** NPM package to create a script that automates appointment setting through google calendar allowing instructors to take on 10% more students
- Developed tests, lectures, apps, and instructional videos designed to teach students the MERN stack
- Created curriculum to teach students the basics of computer science, data structures, & algorithms reducing the time to placement from 5.5 months to just 4
- Facilitated projects among teams of students and reviewed all code submissions for bugs
- Taught students how to code in JavaScript, React/Redux, Express/Node, HTML, & CSS

CUSTOMER SERVICE REP/BOOKKEEPER
S&G Global Holdings – Irvine, CA - 2014 - 2017

- Wrote Python scripts to automate 80 hours per month of data entry work
- Created a browser extension for chrome to allow easy

PROJECTS

Basechamp   **LiveSite | GH**
A RESTful single page web app
React, Redux, Rails, PostgreSQL, JavaScript

- Allowed users to create projects by dispatching actions to the redux store and used AJAX requests to persist data to Rails backend with PostgreSQL database
- Stored data in the cloud with AWS S3 for increased performance and scalability
